Email: ritwalanil@gmail.com Mob: +91-9911272206 Location: Pune, India

SUMMARY

- Backend Engineer with 5+ years of experience building scalable APIs and secure systems using .NET Core and TypeScript.
- Expertise in authentication (JWT, refresh tokens), role-based access control (RBAC), and performance optimization using caching and async processing.
- Currently building a personal finance platform with a modular, microservice-ready architecture.
- Strong background in system design, clean architecture, and backend scalability.

SKILLS

- **Languages:** C#, TypeScript
- **Backend:** .NET Core, ASP.NET Core, REST APIs
- **Architecture:** Microservices, System Design, Repository Pattern
- **Security:** JWT Authentication, Refresh Tokens, RBAC
- **Performance:** Caching, Rate Limiting, Async Programming
- **Databases:** SQL, MongoDB
- **Tools:** Git, Postman

EXPERIENCE

Software Developer

Dassault Systemes and Solutions Pvt. Ltd

JUL 2023 To Ongoing Pune

- Designed and optimized high-performance data pipelines, reducing processing time by 15% for large-scale datasets
- Integrated legacy backend modules with modern TypeScript services, reducing manual effort by 30%
- Improved system reliability by standardizing error handling and validation mechanisms
- Developing tactical planning scheduler.

Software Developer

Prototech Solutions and Services Pvt. Ltd

DEC 2021 To JUL 2023 Pune

- Developed desktop applications using C#, WinForms, and WPF following MVVM architecture
- Built reusable components and improved application maintainability using SOLID principles
- Collaborated with global clients to deliver scalable engineering tools

Senior Engineer

Tata Technologies Ltd

MAY 2020 To JUNE 2021 Pune

- Developed VR/AR simulation systems using Unity3D and C#
- Improved application performance by identifying and resolving bottlenecks
- Built reusable and efficient modules for engineering workflows

EDUCATION

B. Tech
Ideal Institute of Technology

Diploma
PDM Polytechnic

LANGUAGES

English
Advanced

Hindi
Native

PROJECTS

- Developed CAD simulation plugin using C# and WinForms.
- Built a plugin using C#, WinForms, and MVC architecture to manage CAD project metadata and automate file tracking.
- Strategic and Tactical Planning Application using C#, WPF, XML, MVVM, .NET
- App for Mining Earth Resource Estimation C++, JS, TypeScript
- Personal Finance Portfolio Tracker (Next.js + ASP.NET Core)
  - Designed and developed a scalable backend using ASP.NET Core with modular architecture
  - Implemented JWT authentication with refresh token lifecycle and secure hashing
  - Built role-based access control (RBAC) for fine-grained permission management
  - Designed repository pattern with caching and DAL separation
  - Integrated multiple data sources (JSON, SQL, Google Sheets)
  - Architected system for future microservice scalability

ACHIEVEMENTS

- Improved system performance by 4× through algorithm and memory optimization in C# modules
- Awarded Best Employee of the Quarter for performance improvements
- Built cross-platform simulation tools improving workflow automation
